I am surprised this is happening. I think that number 1 I thought we were a free market no monopolies yet the NAB is trying to monopolise radio if I want to pay for it and not listen to local it should be my choice not the NAB. I believe this country is a wonderful place and one reason is because our retail and products we offer are great and that is due to competition. I think competition makes the product greater and I think that ruling against the XM radio using this to inform us of traffic weather or our sports is a terrible decision. I also know that we as a country shut down or went after companies like microsoft, ATT and others that dominate what the people get because of no competition do not let radio become a casualty to NAB or other monopolising and over powering organizations.

Thank You
